

FIXING BALL MARKS IS A GREAT WAY TO HELP KEEP YOUR COURSE LOOKING GREAT!

**THE RIGHT WAY
- HOURS TO HEAL**

1. Place divot tool in ground directly around ball mark.
2. Push the earth forward over the top of the mark.
3. Do this repeatedly around entire ball mark until filled.
4. Gently tap down the mark with your putter

**THE WRONG WAY
28 DAYS TO HEAL**

This causes the grass roots to tear and creates a round brown spot on the green. None of us like putting over them.

PLEASE REPLACE YOUR DIVOTS

Please replace your divot wherever possible. If any exposed grass roots are still showing, please cover that portion with the sand and seed that is in the bottles on your golf cart.
